

Level 1 Green

Trail surface consisting of loose rock, dirt, and sand with some slick surfaces. Erosion washes, gulches and rock steps no higher the 12" may be present. 4WD is recommended with good ground clearance and driving skills. Aggressive tires and limited slips would be a plus. Water and mud is possible.

Level 2 Blue

Trail surfaces are rutted, rocky and sandy with steps not exceeding 14" with considerable slick rock surfaces and are difficult with considerable erosion damage but passable. Water not exceeding 14" with mud possible. Good vehicle approach and departure angles are helpful. Tall tires (32" Plus) and traction added device (lockers, limited slips) is recommended. Above average driving skills are

Level 3 Black

Trail consists of rock, trees, sand and considerable slick rock with many steps exceeding 24". Off camber inclines are prevalent. Enhanced off-road equipment is required including locking devices (front & rear), tall tires, maximum vehicle ground clearance, and tow points. A winch is desirable. Excellent driving skills are required. Vehicle, mechanical, equipment, or body damage is likely. Roll over possibilities exist.

Level 4 Red

Let the carnage begin! Buggy territory. Street driven 4X4's should not attempt this trail. Modified factory vehicles will not be able to complete this trail. Tow Points are a must. Excellent driving skills are required. Roll over is very common. Winches, spare parts and tools are recommended
